TITLE	Individualized Materials for the Handicapped: A Guide for Selection.
INSTITUTION	Eastern Pennsylvania Regional Resources Center for Special Education, King of Prussia.
SPONS AGENCY	Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.
PUB DATE	77
NOTE	73p.
EDRS PRICE	MF-$0.83 HC-$3.50 Plus Postage.
DESCRIPTORS	Elementary Secondary Education; *Handicapped Children; Individualized Programs; *Instructional Materials; *Instructional Media; Language Arts; Mathematics; *Media Selection; Preschool Education; Reading; Resource Guides; Sciences; Social Studies

ABSTRACT

Intended for teachers of the handicapped, the booklet provides a guide for choosing individualized instructional materials. Materials are noted to generally fall into six program categories: reading, mathematics, language arts, social studies, science, and other resources. Information on each instructional kit/program (listed alphabetically under the publisher) is provided in table form and includes publisher/title/date, grade level/exceptionality, format (curriculum role, performance objectives, record keeping system, or assessment), and components (activity cards/sheets, books, cassettes/records, duplicating masters, filmstrips, manipulatives, student workbooks, and other). Also given are a grade level index, a title index, and a list of publishers' names and addresses. (SBH)

PREFACE

The proposed Pennsylvania Special Education Standards, which reflect both State Board Regulations and federal legislation, require an Individualized Education Program (IEP) for each exceptional student identified as needing special education or related services (PDE, 1977). Such plans will of course require appropriate, individualized instructional materials. Yet at present, no *comprehensive* index exists—either of individualized materials for the handicapped or of materials for individualizing instruction. In view of this need, and in response to the requests we are receiving from the field, the Eastern Pennsylvania Regional Resources Center (RRC) has developed this *Guide for Selection*.

Individualized instruction is many things to many people. According to *EPIE Reports* (1972), there are three basic principles to consider when devising an individualized instruction program:

> (a) Individualization is multi-dimensional; a particular package or program can be "individualized" in some ways and not in others. (b) A second principle is that the degree of individualization is found in the usage of materials as well as in their inherent qualities. (c) The third principle is that all learning, all instruction, must be viewed as individualized to some degree. (pp. 7-8)

These considerations proved to be fundamental in developing our strategy to identify individualized instructional materials.

We have chosen to include instructional material kits that have several components appropriate for individualization. The more comprehensive the program, the easier it will be for teachers to implement, that is, they will have access to compatible components, from objectives through assessment. Once accustomed to setting up individual instructional programs, teachers will very likely become more selective and creative in adapting other materials for individual needs.

We have included programs which contain at least some of the following components: performance objectives (or specification of outcome goals), a variety of activities for achieving mastery, monitoring of learning, and suggestions for evaluation approaches (see EPIE, 1972, pp. 12-15). Since it is impossible to include every commercially available material meeting these criteria, we would stress that the *Guide* contains only a representative sample of what is in the market.

Since no other guide of this kind is presently available, it should prove of great value for teachers choosing individualized materials and writing IEPs. The alternative is either to choose from a narrow available sampling of materials (and thus eliminate potentially useful ones) or to spend an inordinate amount of time searching through hundreds of publishers' catalogs. Because RRC has used a variety of resources and expertise in preparing the *Guide* (complete files of publishers' catalogs, research information, and experienced personnel), special educators can avoid needless duplication of local time and effort in searching for appropriate materials.

How to Use This Book

The materials identified fall generally into six program categories: Reading, Mathematics, Language Arts, Social Studies, Science, and Other Resources. The latter term covers a number of areas—among them developmental skills guides, inservice training programs, resource guides—for both regular and special education teachers. Materials which fit in more than one category are listed twice. **The grid pages are self-explanatory, except for "Curriculum role" (column 1 of "Format") where S = Supplemental, and B = Basal.** The grade-level index lists materials alphabetically by title in two sections: Preschool-Elementary (K-6) and Intermediate-Secondary (7-12). Inevitably, some programs overlap these divisions; they have been listed twice. A title index and a list of publishers' names and addresses is also provided.
